Special Issue on Liquid Chromatography

Call for Papers

Liquid chromatography is a category of chromatography in which the mobile phase is a liquid. In recent years, **high-performance liquid chromatography** (HPLC) has been widely used as a separation technique for its high efficiency, high sensitivity, high speed, and wide range of application. Over the past decades, **liquid chromatography** has been extensively studied to examine the food security, the quality of the drugs, and to analyze environmental pollutants, etc. which has greatly affected the life quality of human beings.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **liquid chromatography**. Potential topics include, but are not limited to:

- Application of HPLC in agriculture
- Biomedical and biochemical applications of liquid chromatography
- Sample preparation technology of liquid chromatography
- Liquid chromatography in pharmaceutical analysis
- Liquid chromatography in environmental analysis
- Liquid chromatography in food analysis

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue – *Liquid Chromatography***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	October 20th, 2015
Publication Date	December 2015
