

## Special Issue on Solar Energy Research

### Call for Papers

**Solar Energy** technologies will have huge longer-term benefits on humans for its clean, affordable, inexhaustible advantage. It will increase countries' energy security through reliance on an indigenous, inexhaustible and mostly import-independent resource, enhance sustainability, reduce pollution, lower the costs of mitigating climate change. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **solar energy research**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **solar energy research**. In this special issue, potential topics include, but are not limited to:

- Solar energy utilization
- Development of solar energy technology
- Applications of solar technology
- Solar cells
- Photovoltaic
- Concentrated solar power

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Solar Energy Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 29th, 2014
Publication Date	July 2014

#### Guest Editor:

Prof. Fermín Mallor

Public University of Navarre, Spain
