

## Special Issue on Energetic Complementarity

### Call for Papers

The purpose of this Special Issue is to concentrate unpublished results of research and engineering projects related to energetic complementarity and hybrid systems based on complementary energy resources. This Special Edition should also be open to contributions in the form of reviews, bringing up ideas that can be obtained from past articles and ideas arising from the comparison of the articles of the last few years.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **energetic complementarity**. Potential topics include, but are not limited to:

- Identification of complementarity in different places
- Quantification of complementarity
- Simulation of hybrid systems
- Operating systems
- Complementary energy resources
- Simulations based on specific software (such as Homer and RETScreen)

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Energetic Complementarity**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 14th, 2016
Publication Date	June 2017
