

Special Issue on Geography and Geomorphology

Call for Papers

Geomorphology is the study of the nature and history of landforms and the processes which create them. Initially, the subject was committed to unravelling the history of landform development, but to this evolutionary approach has been added a drive to understand the way in which geomorphological processes operate. In many cases, geomorphologists have tried to model geomorphological processes, and, more recently, some have been concerned with the effect of human agency on such processes. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Geography and Geomorphology**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geography and Geomorphology**. In this special issue, potential topics include, but are not limited to:

- Maps, remote Sensing, and GIS
- Geomorphology and physical geography
- Coastal geography
- Geospatial informatics
- Environmental geography
- Regional geography
- Earth surface processes and landforms
- Geography, urban geomorphology and sustainability
- Geomorphology and soil geography
- Tectonics and geomorphology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Geography and Geomorphology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 16th, 2026
Publication Date	July 2026

Guest Editor:

Scientific Research
Open Access

**International Journal of
Geosciences**
ISSN Online: 2156- 8367

Prof. P.K. Garg, Geomatics Engineering Group, Civil Engineering Department at
Indian Institute of Technology (IIT) Roorkee, Uttarakhand, India.
