

Special Issue on Brain, Cognition and Behavior

Call for Papers

Research in the cognition, brain, and behavior group includes studies of sensation and perception, learning and memory, attention, mental imagery, conceptual representation, aging, language, emotion, motor control, social cognition, moral decision making, and neurological disorders. In this area, psychologists examine how we perceive the world, acquire new information, retrieve memories, communicate and interact with others, and effect complex cognitive abilities such as creative problem solving.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Brain, Cognition and Behavior**. Potential topics include, but are not limited to:

- Cognitive neuroscience
- Psychological and brain science
- Models of perception
- Functional patterns and behaviors
- Attention deficits
- Language, brain and behavior
- Memory and learning
- Visual and spatial cognition
- Emotion, affect, and cognition
- Cognitive development and aging
- Mental illness and brain research
- Decision-making
- Social learning
- Interface of attention, memory, and reasoning
- Brain injury and anxiety/depression disorders
- Neuroimaging techniques

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Brain, Cognition and Behavior**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 17th, 2021
Publication Date	August 2021
