**Special Issue on**  
**Environmental Pollution and Restoration**  
**Call for Papers**

Environmental Pollution and Restoration focuses on the causes, impacts, and solutions related to environmental pollution and ecosystem restoration. It welcomes research on air, water, and soil contamination, waste management, remediation technologies, and ecological rehabilitation strategies. Studies addressing sustainable practices, pollution monitoring, risk assessment, and policy frameworks are also encouraged. By integrating environmental science, engineering, and management perspectives, this issue aims to advance knowledge and practical approaches for mitigating environmental degradation and promoting the restoration of healthy, resilient ecosystems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Pollution and Restoration**. Potential topics include, but are not limited to:

- Air pollution monitoring
- Bioremediation and phytoremediation
- Climate change and pollution interactions
- Ecological restoration
- Environmental policy and regulation
- Environmental toxicology
- Heavy metal contamination
- Industrial pollution
- Pesticide and chemical pollutants
- Pollution modeling and risk assessment
- Soil contamination and remediation
- Sustainable land management
- Urban environmental management
- Waste management and recycling
- Water pollution control
- Wetland and river rehabilitation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Pollution and Restoration**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 25th, 2026
Publication Date	April 2026

**Guest Editor:**

Dr. Anthony Phiri

Environmental Management, Renewable Energy and Climate Change Center  
Harare Institute of Technology, Zimbabwe
