**Special Issue on**  
**Environmental Chemistry and Pollution Studies**

**Call for Papers**

Environmental Chemistry and Pollution Studies focuses on the chemical processes that govern the sources, transformation, transport, and impacts of pollutants in air, water, and soil systems. This special issue highlights analytical techniques for pollutant detection, chemical fate and behavior in the environment, and the assessment of ecological and human health risks. Emphasis is placed on interdisciplinary approaches that integrate environmental chemistry with toxicology, remediation technologies, and regulatory science to address pollution prevention, mitigation, and sustainable environmental management in both natural and engineered systems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Chemistry and Pollution Studies**. Potential topics include, but are not limited to:

- Air pollution chemistry and atmospheric processes
- Chemical fate and transport of pollutants
- Emerging contaminants and micropollutants
- Environmental analytical chemistry
- Environmental inorganic chemistry
- Environmental organic chemistry
- Environmental regulations and chemical policy studies
- Environmental risk assessment and modeling
- Green chemistry for pollution prevention
- Heavy metals and trace element pollution
- Persistent organic pollutants (POPs)
- Pollution source identification and apportionment
- Remediation chemistry and cleanup technologies
- Soil and sediment contamination studies
- Toxicological assessment of environmental contaminants
- Water quality chemistry and aquatic pollution

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

---

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Environmental Chemistry and Pollution Studies***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 28th, 2026
Publication Date	June 2026

**Guest Editor:**

Dr. Carmen ZAHARIA

Chemical Engineering and Environmental Protection

"Gheorghe Asachi" Technical University of Iasi, Romania
