

Special Issue on
Environmental Science and Public Health

Call for Papers

Environmental Science and Public Health explores the complex interactions between environmental factors and human health. It investigates how air, water, soil, and climate conditions, as well as pollution and chemical exposures, impact the spread of diseases, overall well-being, and population health outcomes. Integrating perspectives from environmental science, epidemiology, toxicology, and public health policy, this theme emphasizes evidence-based approaches for monitoring, preventing, and mitigating environmental health risks. Research in this area informs sustainable practices, regulatory frameworks, and public health interventions aimed at protecting communities and promoting long-term ecological and human health.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Science and Public Health**. Potential topics include, but are not limited to:

- Air quality and pollution studies
- Climate change and health impacts
- Ecotoxicology and ecosystem health
- Environmental epidemiology
- Environmental health education and promotion
- Environmental microbiology
- Environmental policy and regulation
- Occupational and workplace health
- Public health surveillance and monitoring
- Risk assessment and management
- Soil and land contamination
- Sustainable environmental practices
- Toxicology and chemical exposure
- Vector-borne and infectious diseases
- Waste management and pollution control
- Water quality and sanitation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Science and Public Health**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 10th, 2026
Publication Date	August 2026

Guest Editor:

Dr. Ping Xiang

Institute of Environmental Remediation and Human Health

Southwest Forestry University, Kunming, China
