
Special Issue on
Smart Service, Business and Information System
Call for Papers

Application of electronic and digital technologies is widely used in services and business. Information technology and innovation are impacting many industries. There is a growing demand of smart service. Smart service combines intelligent analysis of data and add value of services and finance.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Smart Service, Business and Information System**. Potential topics include, but are not limited to:

- Software services and business management
- Smart city and smart home
- E-government
- Artificial intelligence in services
- Network and organizational management
- Enterprise applications and solutions
- E-business and e-commerce
- Business and networks
- Neural network and business
- Smart healthcare services and system

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Smart Service, Business and Information System**” should be chosen during your submission.
