

Special Issue on Resource Security

Call for Papers

Security problems facing nations in the 21st century increasingly spill over geographic, disciplinary, and institutional boundaries, making concerted attentions to the challenges of updating methods for delivering and acting upon strategic. One of the most urgent problems among these is the resource security problem.

The security problems related to water, food, energy and other natural resources are quickly escalating to chronic impediments to economic growth and social stability. As the world's population rapidly grows from 6 billion people today to an estimated 9 billion people in 2050, resource security problems are going to be more and more serious and important.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **resource security**. Potential topics include, but are not limited to:

- Water security
- Energy security
- Food security
- Mineral security
- Air security
- Resource security and management
- Forest security
- Soil security

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Resource Security**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	April 2rd, 2014
Publication Date	June 2014

Guest Editors:

Prof. **Miklas Scholz**

The University of Salford, UK

Prof. **Santosh Kumar Sarkar**

University of Calcutta, India
