

Special Issue on Geothermal Resource

Call for Papers

Geothermal Resource as a kind of clean energy is attached importance by the world. It is an environmentally friendly, cost effective and inexhaustible energy source at a human scale, which is generated and stored in the Earth. It exists virtually everywhere, and is available at all times. Even though geothermal energy is globally sustainable, exploitation of this resource must be monitored to avoid local depletion. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **geothermal resource**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **geothermal resource**. Potential topics include, but are not limited to:

- Technique of geothermal power
- Exploration and development of geothermal resource
- Application of geothermal resource
- Assessment of geothermal resource
- Analysis of geothermal system

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Geothermal Resource**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 20th, 2014
Publication Date	October 2014
