

Special Issue on Bioenergy and Biomass

Call for Papers

Bioenergy is a form of renewable energy derived from biomass to generate electricity and heat or to produce liquid fuels for transport. It is available in many forms such as agriculture products, forestry products, and municipal and other waste. Bioenergy development and utilization of extensive attention both at home and abroad is a major issue. It offers the potential for considerable economic benefits, including increasing energy security, reducing greenhouse gas emissions, and stimulating regional development.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **bioenergy and biomass**. Potential topics include, but are not limited to:

- Biofuel
- Biogas
- Biomass
- Biodiesel
- Bioethanol
- Biological residues
- Bioenergy industry
- Technology of bioenergy and biomass
- Applications
- Bioenergy and economic benefits

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Bioenergy and Biomass**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 26th, 2015
Publication Date	January 2016
