

Special Issue on Breast Health and Clinical Practice

Call for Papers

Breast Health and Clinical Practice encompasses the prevention, diagnosis, treatment, and long-term management of conditions affecting the breast, with a particular emphasis on improving patient outcomes and quality of care. It covers a wide range of topics, including cancer screening, diagnostic imaging, pathology, surgical interventions, medical therapies, genetic risk assessment, and survivorship care. The field integrates advances in clinical medicine, oncology, radiology, surgery, and public health to support evidence-based approaches to disease prevention and treatment. Through multidisciplinary collaboration and ongoing research, Breast Health and Clinical Practice aims to enhance early detection, optimize therapeutic strategies, and promote comprehensive patient-centered care.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Breast Health and Clinical Practice**. Potential topics include, but are not limited to:

- Cancer screening
- Diagnostic imaging
- Mammography
- Ultrasound diagnostics
- Magnetic resonance imaging
- Oncology care
- Surgical management
- Reconstructive surgery
- Pathological diagnosis
- Genetic testing and counseling
- Hormone therapy
- Targeted therapy
- Immunotherapy
- Survivorship care
- Clinical outcomes research
- Patient-centered care

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Breast Health and Clinical Practice**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 16th, 2026
Publication Date	November 2026

Guest Editor:

Dr. Jasneth Mullings

Health Research Resource Unit, India
