

Special Issue on
Applied and Environmental Microbiology
Call for Papers

Environmental Microbiology is the ecology of microorganisms: their relationship with one another and with their environment. Microbial life plays a primary role in regulating biogeochemical systems

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Applied and Environmental Microbiology**. Potential topics include, but are not limited to:

- Microorganisms and environmental health
- Microbial ecology and community
- Bacterial diversity and ecological studies
- Microbial processes and molecular biology
- Bacteria and wastewater treatment
- Biotechnology
- Microbial technology and agricultural science
- Plant pathology and environmental microbiology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Applied and Environmental Microbiology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 22nd, 2021
Publication Date	May 2021

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
