**Special Issue on**  
**Environmental Monitoring and Analytical Chemistry**

**Call for Papers**

Environmental pollutants are chemicals that have ended up in the environment as the result of human activities and that are hazardous to health. Humans are exposed to environmental pollutants mainly through food, but also through inhalation. At present, analytics and environmental monitoring are among the most dynamically developing branches of chemical analysis. The pursuit of getting the complex information on environmental quality leads to developing new methods and analytical techniques. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Environmental Monitoring and Analytical Chemistry**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Monitoring and Analytical Chemistry**. In this special issue, potential topics include, but are not limited to:

- Routine environmental monitoring
- Sampling methodology
- Multi-element analytical techniques for trace element studies and online monitoring of pollution
- Development of sensor systems and analytical routines, including quality assurance of environmental data
- Development of analytical tools for monitoring environmental organic contamination
- Enzyme-linked immunosorbent assay
- Functional materials for pollution control and energy related issues

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Monitoring and Analytical Chemistry**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 30th, 2026
Publication Date	July 2026

**Guest Editor:**

Dr. Aparna Gunjal, Dept of Microbiology, Dr. D. Y. Patil, Arts, Commerce and Science College, Pimpri, Pune, Maharashtra, India.
