

# Table of Contents

Volume 6 Number 3

September 2016

## High Energy Physics and Cosmology as Computation

M. S. El Naschie.....185

## An Optimal Policy with Quadratic Demand, Three-Parameter Weibull Distribution Deterioration Rate, Shortages and Salvage Value

P. J. Mishra, T. Singh, H. Pattanayak.....200

## Application of OHAM-DJ to the System of Burgers' Equations

F. A. Alhendi, B. S. Kashkari A. A. Alderremy.....212

## Concentration Wave for a Class of Reaction Chromatography System with Pulse Injections

J. Zhang, M. F. Shao, T. Pan.....224

## Calculation of the Average Irradiance and the Microalgae Growth for a Year at CUET, Bangladesh

I. A. Khanam, U. K. Deb.....237

## Numerical Treatment of Nonlinear Volterra-Fredholm Integral Equation with a Generalized Singular Kernel

F. A. Hendi, M. M. Al-Qarni.....245

## Numerical Investigation of a Mixed Convection Flow in a Lid-Driven Cavity

R. Omari.....251

## Some Properties of the $g$ -Good-Neighbor ( $g$ -Extra) Diagnosability of a Multiprocessor System

Y. X. Ren, S. Y. Wang.....259

## Computer Simulation of Transition Regimes of Solitons in Four-Photon Resonant Parametric Processes in Case of Two-Photon Resonance

V. Feshchenko, G. Feshchenko.....267

## Adaptive Finite Element Method for Steady Convection-Diffusion Equation

G. T. Mekuria, J. A. Rao.....275
