**Special Issue on**  
**Production Management, Manufacturing, and Operations**  
**Call for Papers**

Production Management, Manufacturing, and Operations examines the planning, organization, control, and continuous improvement of production processes and operational activities across manufacturing and service environments. The field addresses production planning, process optimization, capacity management, quality control, inventory management, supply chain coordination, facility planning, and workforce organization to enhance productivity and operational performance. Research also considers lean manufacturing, agile production, sustainable operations, industrial automation, smart manufacturing, and data-driven decision-making. Advances in digital technologies, robotics, intelligent systems, and integrated production platforms are creating new opportunities to improve efficiency, flexibility, quality, resilience, and sustainability throughout modern operational systems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Production Management, Manufacturing, and Operations**. Potential topics include, but are not limited to:

- Production planning
- Operations management
- Manufacturing systems
- Process optimization
- Quality management
- Inventory management
- Supply chain management
- Capacity planning
- Facility planning
- Lean manufacturing
- Agile manufacturing
- Smart manufacturing
- Industrial automation
- Production scheduling
- Maintenance management
- Sustainable manufacturing

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Production Management, Manufacturing, and Operations**” should be selected during your submission.
