

Special Issue on Plant Morphology Research

Call for Papers

This special issue on “**Plant Morphology**” will be focusing on the latest development in the forms, structures of plants and so on. The morphologists’ researches mainly involve in four major areas: similarities in different plants of the same or different species, the vegetative structures and the reproductive structures, ultra structures and the patterns of development for plants. As one of the most important research fields on plants, **plant morphology** is of great attractions to researches.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Plant Morphology Research**. Potential topics include, but are not limited to:

- Homologous organs of plants
- Root structures
- Leaves structures
- Flower structures
- Seed structures
- Embryo structures of plants
- Ultrastructures of plant cells

Authors should read over the journal’s [Authors’ Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue- Plant Morphology Research**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	October 8th, 2013
Publication Date	December 2013
