

Special Issue on Tobacco Research

Call for Papers

This special issue on “**Tobacco Research**” will be focusing on the latest development in tobacco. Tobacco refers to more than 70 plant species within the genus nicotiana of the solanaceae family. Tobacco is cultivated annually, and can be harvested in several ways. The products of tobacco manufactured from dried tobacco leaves, including cigars and cigarettes, snuff, pipe tobacco and so on. Further uses of tobacco are in plant bioengineering and as ornamentals, and chemical components of tobacco are used in some pesticides and medications. As one of the most important research fields of plant research, **tobacco** is of great attractions to researchers.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **tobacco**. Potential topics include, but are not limited to:

- Tobacco leaves
- Tobacco products
- Transgenic tobacco
- Tobacco control
- Tobacco industry
- Tobacco of human health hazard

Authors should read over the journal’s [Authors’ Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Tobacco Research**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	August 7th, 2014
Publication Date	October 2014

Guest Editor:

Dr. Sukumar Saha
