

Special Issue on
Weed Science and Weed Management Systems

Call for Papers

Research on weed focuses on the study of plants that are considered undesirable or invasive in agricultural, horticultural, and natural landscape settings. This field of scientific investigation aims to understand the biology, ecology, management, and economic impacts of weeds. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Weed Science and Weed Management Systems**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Weed Science and Weed Management Systems**. In this special issue, potential topics include, but are not limited to:

- Sustainable weed management
- Herbicide resistant weeds
- Precision agriculture weed research
- Herbicide and soil interactions
- Weed shifts in diverse weed management systems
- Perennial and noxious weed control
- Weed risk assessment and prevention
- Weed ecology in natural landscapes
- Weed control in different cropping systems
- Crop-weed interactions

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Weed Science and Weed Management Systems**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 30th, 2026
Publication Date	June 2026

Guest Editor:

Scientific Research
Open Access

**American Journal of
Plant Sciences**
ISSN Online: 2158-2750
