

Special Issue on Plant Resources Science

Call for Papers

Plant Resources Science is the interdisciplinary study of the diversity, characterization, conservation, sustainable utilization, and economic evaluation of plant species and their genetic resources. It integrates principles from botany, ecology, genetics, phytochemistry, agronomy, and ethnobotany to explore the potential of wild and cultivated plants for food, medicine, energy, materials, and environmental services. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Plant Resources Science**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Plant Resources Science**. In this special issue, potential topics include, but are not limited to:

- Plant Genetic Resources and Germplasm Conservation
- Wild and Underutilized Plant Species
- Phytochemical Resources and Natural Products
- Plant-based Bioenergy and Biomaterials
- Medicinal and Aromatic Plant Resources
- Ornamental and Landscape Plant Resources
- Economic Botany and Plant Resource Valuation
- Climate Change and Plant Resource Dynamics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Plant Resources Science**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 8th, 2026
Publication Date	September 2026
