

Special Issue on Plant Morphology & Anatomy

Call for Papers

Plant Morphology and Anatomy is the branch of botany that investigates the external form (morphology) and internal structure (anatomy) of plants. It seeks to understand the diversity, development, and functional significance of plant organs, tissues, and cells across different life stages and evolutionary lineages. By integrating descriptive, comparative, and developmental approaches, plant morphology and anatomy provide fundamental insights into how plants adapt to their environments, how they are systematically classified, and how they carry out essential physiological processes. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Plant Morphology & Anatomy**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Plant Morphology & Anatomy**. In this special issue, potential topics include, but are not limited to:

- Comparative Morphology and Systematics
- Plant Development (Plant Morphogenesis)
- Functional Morphology
- Plant Anatomy (Microscopic Structure)
- Developmental Anatomy
- Floral and Fruit Morphology
- Micromorphology and Ultrastructure
- Developmental and Evolutionary Morphology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Plant Morphology & Anatomy**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 18th, 2026
Publication Date	September 2026

Guest Editor:

Scientific Research
Open Access

**American Journal of
Plant Sciences**
ISSN Online: 2158-2750
