

TABLE OF CONTENTS

Volume 5 Number 2

January 2014

An Algorithm for Infinite Horizon Lot Sizing with Deterministic Demand	
M. Horniaček.....	217
An Approach to Solve a Possibilistic Linear Programming Problem	
R. Chopra, R. R. Saxena.....	226
An Automated Model for Fitting a Hemi-Ellipsoid and Calculating Eigenvalues Using Matrices	
A. R. Billington, P. J. Fabri, W. E. Lee III.....	234
Reliable Network Design Problem under Node Failure with Benders Decomposition	
T. Liu, W. G. Yang, J. Huang.....	241
Fixed-Point Iteration Method for Solving the Convex Quadratic Programming with Mixed Constraints	
R. P. Wang, H. Shi, K. Ruan, X. Y. Gao.....	256
Optimal Consumption under Uncertainties: Random Horizon Stochastic Dynamic Roy's Identity and Slutsky Equation	
D. W. K. Yeung.....	263
Manpower Systems Operating under Heavy and Light Tailed Inter-Exit Time Distributions	
R. Sivasamy, P. T. Rao, K. Thaga.....	285
The Optimal Inventory Policy for Reusable Items with Random Planning Horizon Considering Present Value	
S.-M. Su, S.-D. Lin, L.-F. Chang.....	292
Finding and Choosing among Multiple Optima	
J. Guenther, H. K. H. Lee, G. A. Gray.....	300
On Metaheuristic Optimization Motivated by the Immune System	
M. F. Elettrey, E. Ahmed, H. B. Khenous.....	318

The figure on the front cover is from the article published in Applied Mathematics, 2014, Vol. 5, No. 2, pp. 241-255 by Tie Liu, Wenguo Yang and Jun Huan.
