

Special Issue on Fuzzy Mathematics and Its Applications

Call for Papers

Fuzzy mathematics is research and treatment of ambiguity phenomenon a new branch of mathematics, it is to use mathematical method reveals fuzzy things internal and fuzzy quantitative relationship between cases. Fuzziness can be found in many areas of daily life, such as in engineering, medicine, meteorology, manufacturing, economy, and others. It is particularly frequent, however, in all areas in which human judgment, evaluation, and decisions are important.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **fuzzy mathematics and its applications**. Potential topics include, but are not limited to:

- Fuzzy sets
- Fuzzy graphs
- Fuzzy mappings
- Fuzzy clustering
- Fuzzy model recognition
- Fuzzy decision
- Fuzzy technology
- Fuzzy linear program
- Possibility theory
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Fuzzy Mathematics and Its Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 21st, 2016
Publication Date	March 2016

Guest Editor:

Scientific Research
Open Access

Applied Mathematics

ISSN Online: 2152-7393
