Special Issue on Weed Science and Weed Management

Call for Papers

Weed control is the botanical component of pest control, which attempts to stop weeds, especially noxious or injurious weeds, from competing with desired flora and fauna, this includes domesticated plants and livestock, and in natural settings, it includes stopping non local species competing with native, local, species, especially so in reserves and heritage areas. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Weed Science and Weed Management**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Weed Science and Weed Management**. In this special issue, potential topics include, but are not limited to:

- Sustainable weed management
- Herbicide resistant weeds
- Precision agriculture weed research
- Herbicide and soil interactions
- Weed shifts in diverse weed management systems
- Perennial and noxious weed control

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Weed Science and Weed Management***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 10th, 2027
Publication Date	March 2027
