

Special Issue on Petroleum Engineering and Technology

Call for Papers

Petroleum engineering and technology is a combination of innovation, exploration and expansion. Energy is a key component in our everyday lives. A secure energy future requires a balance between environmental impact and affordable supply. Petroleum engineers have a future full of challenges and opportunities which to develop and apply new technology to recover hydrocarbons.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **petroleum engineering and technology**. Potential topics include, but are not limited to:

- Petroleum exploration and production
- Hydrocarbons production
- Petroleum geology and geophysics
- Formation evaluation, drilling and economics
- Oil refining
- Petroleum technologies
- Synthetic fuel technology
- Oil shale technology
- Reservoir simulation and evaluation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Petroleum Engineering and Technology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 19th, 2016
Publication Date	June 2016
