

## Special Issue on Mechanical Engineering

### Call for Papers

Mechanical engineering has traditionally dealt with objects and systems at macroscopic length scales. The mechanical engineering field requires an understanding of core areas including mechanics, dynamics, thermodynamics, materials science, structural analysis, and electricity. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **mechanical engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **mechanical engineering**. In this special issue, potential topics include, but are not limited to:

- Machinery manufacturing and automation
- Mechatronic engineering
- Mechanical design and theory
- Mechanical dynamics
- Mechanical reliability
- Mechanical engineering and artificial intelligence

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Mechanical Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 12th, 2019
Publication Date	February 2020
