

Special Issue on Electrical Engineering and Automation

Call for Papers

The Electric Engineering and Automation is applied throughout the generation, transmission, distribution, conversion and applications of electric energy, focusing on the design, manufacture, operation, measurement and control of all types of electrical equipment as well as science and engineering technology issues in the interaction between various types of energy and electricity. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Electrical Engineering and Automation**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Electrical Engineering and Automation**. In this special issue, potential topics include, but are not limited to:

- Control and Automation
- Materials and Mechanical Engineering
- Electronics Engineering and Electrical Engineering
- Modeling and Simulation
- Testing and Imaging
- Robotics
- Actuating and Sensing
- Power system analysis
- Actuating and Sensing

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Electrical Engineering and Automation**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 30th, 2026
Publication Date	July 2026

Guest Editor:

Prof. Minghe Chi, Harbin University of Science and Technology, China.
