

Special Issue on Food Quality Management

Call for Papers

Food Quality Management encompasses the systematic control and assurance of food safety, quality, and compliance across the entire supply chain, from raw material sourcing to final consumption. It integrates standards such as HACCP, ISO frameworks, and regulatory guidelines to minimize risks related to contamination, spoilage, and fraud. The field addresses key processes including quality monitoring, traceability, testing, and continuous improvement, while also considering consumer expectations, nutritional value, and sustainability. Through the application of scientific methods and management practices, it supports the delivery of safe, high-quality food products and enhances trust in food systems.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Food Quality Management**. Potential topics include, but are not limited to:

- Food safety management
- Quality assurance systems
- Hazard analysis and critical control points
- Good manufacturing practices
- Food quality control
- Food microbiology
- Food chemistry analysis
- Sensory evaluation
- Food packaging quality
- Supply chain management
- Traceability systems
- Regulatory compliance
- Food inspection and auditing
- Shelf life assessment
- Risk assessment and management
- Quality improvement systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Food Quality Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 20th, 2026
Publication Date	October 2026
