

Special Issue on Medical Imaging

Call for Papers

Medical imaging is a rapidly-growing discipline within the medical field which involves the use of the technology to create images of the internal structures of human body for clinical analysis and medical treatment. There are many types of technologies that are used in medical imaging. Each has its own advantages and disadvantages.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Medical Imaging**. Potential topics include, but are not limited to:

- Echocardiography
- Elastography
- Electroencephalography
- Magnetic resonance imaging
- Magnetoencephalography
- Mammography
- Radiography
- Tomography
- Ultrasonography

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Medical Imaging**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 12th, 2016
Publication Date	July 2016
