

Special Issue on Human Papillomavirus

Call for Papers

Human Papillomavirus (HPV) is a DNA virus that is passed between people through intimate skin-to-skin contact. It is the most common sexually transmitted infection that affects both men and women. Most HPV infections are subclinical and will cause no physical symptoms; others may cause health problems including genital warts and cancers.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Human Papillomavirus**. Potential topics include, but are not limited to:

- HPV vaccines
- Cervical cancer
- Skin warts
- Genital warts
- Plantar warts
- Anogenital warts
- Oral papillomas
- Oropharyngeal cancer
- Epidermodysplasia verruciformis
- Laryngeal papillomatosis
- Respiratory papillomatosis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Human Papillomavirus**” should be selected during your submission.

Special Issue Timetable:

| | |
|---------------------|------------------|
| Submission Deadline | March 10th, 2016 |
| Publication Date | May 2016 |
