

Special Issue on Type 2 Diabetes

Call for Papers

Type 2 diabetes is a long-term metabolic disorder that is characterized by high blood sugar, insulin resistance, and relative lack of insulin. Long-term complications from high blood sugar include heart disease, strokes, diabetic retinopathy which can result in blindness, kidney failure, and poor blood flow in the limbs which may lead to amputations.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Type 2 Diabetes**. Potential topics include, but are not limited to:

- Clinical characteristics and problems
- Metabolic syndrome
- Dysfunction and complications
- Obesity and type 2 diabetes
- Risk of cancer
- Bariatric surgery and metabolic surgery
- Exercise therapy and weight management
- Cardiovascular diseases
- Kidney diseases
- Diet and lifestyle
- Fatty acids in type 2 diabetes
- Genetic perspective
- Screening and prevention

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Type 2 Diabetes**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 14th, 2019
Publication Date	July 2019

Scientific Research
Open Access

Health
ISSN Online: 1949-5005
