Special Issue on

Public Health Research and Development

Call for Papers

The academic topic "Public Health Research and Development" explores scientific research, strategies, and practical approaches to improving population health and preventing diseases. It covers epidemiology, health promotion, disease prevention, environmental health, health education, healthcare policy, community health and public health interventions, with a focus on addressing emerging health challenges, reducing health inequalities, strengthening healthcare systems, and promoting healthier and more sustainable communities.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Public Health Research and Development**. Potential topics include, but are not limited to:

- Epidemiology and Disease Surveillance
- Public Health Policy and Management
- Disease Prevention and Health Promotion
- Environmental Health and Public Health
- Global Health and International Public Health
- Community Health and Health Education
- Infectious Diseases and Public Health
- Chronic Disease Prevention and Control
- Maternal, Child and Reproductive Health
- Nutrition, Food Safety and Public Health
- Occupational Health and Safety
- Mental Health and Public Health
- Health Inequalities and Social Determinants of Health
- Healthcare Systems and Public Health Services
- Public Health Informatics and Digital Health
- Biostatistics and Public Health
- Immunization and Vaccination Programs
- Aging, Gerontology and Population Health
- Public Health Emergency Preparedness and Response
- Population Health, Well-Being and Quality of Life
- Behavioral Science and Health Interventions
- Health Economics and Public Health Development

Authors should read over the journal's For Authors carefully before submission.
