

Special Issue on Geomagnetism

Call for Papers

Geomagnetism is a branch of geophysics that studies Earth's magnetic field, associated phenomena and applications. Earth's magnetic field, also known as the geomagnetic field, is predominantly a geo-axial dipole, with north and south magnetic poles located near the geographic poles that undergo periodic reversals and excursions.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geomagnetism**. Potential topics include, but are not limited to:

- Geomagnetic storms
- Magnetic island
- Magnetic minerals
- Magnetite
- Magnetospheres
- Palaeomagnetism
- Rock magnetism
- Substorm

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Geomagnetism**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 30th, 2016
Publication Date	May 2016
