

Special Issue on Heterocycle Research

Call for Papers

Heterocyclic compounds are widely exists in nature, most important compounds related to the biology of heterocyclic compounds. The counterparts of heterocyclic compounds are homocyclic compounds, the rings of which are made of a single element. Heterocyclic compounds play a important role in organic compounds. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **heterocycle research**.

In this special issue, we are going to invite front-line researchers and authors to submit original research and review articles that explore **heterocycle research**. In this special issue, potential topics include, but are not limited to:

- Pyrrole
- Imidazole
- Pyrazine
- Indoles
- Synthesis of heterocycle
- Application of cyclohexane

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Heterocycle Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	July 15th, 2014
Publication Date	September 2014

Guest Editor:

Prof. **Won-Jea Cho**

Chonnam National University, South Korea
