

Special Issue on Information Mining Technology

Call for Papers

With the development of computer technology and the wide application of database technology and the industry has accumulated a large amount of data which is stored in different forms. But discovering valuable information or knowledge to achieve for decision making purposes becomes very difficult. Data mining technology is born at the right moment, which makes people have the ability to finally recognize the true value of the data. Data mining often defined as the discovery of interesting patterns and important regularities in large information bases or database. In recent years, data mining technology is widely used in business decision-making, such as business management, production control, market analysis, engineering design and scientific exploration. In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **information mining technology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **research on the base - information mining technology**. Potential topics include, but are not limited to:

- Information mining theory
- Data mining and data warehouse
- Information detection
- Web mining technology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Information Mining Technology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 29th, 2014
Publication Date	March 2014

Guest Editor:

Scientific Research
Open Access

**Journal of Computer and
Communications**

ISSN: 2327-5223

Prof. **Vicente Milanés**
University of California Berkeley, USA
