

Special Issue on Wireless Networks and Services

Call for Papers

A wireless network enables people to communicate and access applications and information without wires. This provides freedom of movement and the ability to extend applications to different parts of a building, city, or nearly anywhere in the world. Topics of interest include wireless LANs, radio, network architectures for personal communication systems, and other wireless networks, design and analysis of protocols, network services and service integration, network management and network performance, standardization and regulatory issues, nomadic computing, applications and user interface, specific system descriptions, and enabling technologies for wireless networks.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Wireless Networks and Services**. Potential topics include, but are not limited to:

- Types of wireless networks
- Wireless communications
- Wireless electronic devices
- Design of novel network architectures
- Wireless access techniques
- Applications and user interface
- Wireless traffic and routing
- Wireless networks security

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Wireless Networks and Services**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 30, 2016
Publication Date	May 2016

Scientific Research
Open Access

**Journal of Computer and
Communications**
ISSN Online: 2327-5227
