# Special Issue on Wireless Networks and Services

## Call for Papers

The wireless communication revolution is bringing fundamental changes to data networking, telecommunication, and is making integrated networks a reality. By freeing the user from the cord, personal communications networks, wireless LAN's, mobile radio networks and cellular systems, harbor the promise of fully distributed mobile computing and communications, anytime, anywhere.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Wireless Networks and Services**. Potential topics include, but are not limited to:

- 3G, 4G, and beyond systems
- Ad-hoc networks
- Cognitive radio networks
- Mobile radio networks and cellular systems
- Data fusion in wireless sensor networks
- Location-based services and tracking
- Multi-hop and cooperative communications
- Multi-hop wireless networks
- Multimedia delivery over wireless networks
- Performance evaluation of wireless systems and protocols
- Security and privacy in wireless systems
- Vehicular networks
- Wireless internet and All-IP integration
- Wireless LANs and PANs and WiMAX
- Wireless MAC protocols: design and analysis
- Wireless mesh networks
- Wireless network testbeds and applications
- Wireless sensor networks

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Wireless Networks and Services***" should be selected during your submission.

Special Issue Timetable:

| Submission Deadline | June 15th, 2017 |
|---|---|
| Publication Date | August 2017 |
