

## Special Issue on Computer Vision

### Call for Papers

Computer vision is an interdisciplinary field that is concerned with the automatic extraction, analysis and understanding of useful information from digital images or videos. It involves the development of a theoretical and algorithmic basis to achieve automatic visual understanding.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Computer Vision**. Potential topics include, but are not limited to:

- Computer imagery
- Biomedical image analysis
- Machine vision
- 3D imaging and modelling
- Intelligent vision systems
- Color image processing
- Visual tracking
- Computer vision and robotics
- Facial behaviour analysis
- Image and video understanding in big data

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Computer Vision**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 31st, 2017
Publication Date	October 2017
