Special Issue on Mobile Networks and Applications

Call for Papers

Mobile network is a communication network where the last link is wireless. The network is distributed over land areas called "cells", each served by at least one fixed-location transceiver, but more normally, three cell sites or base transceiver stations. These base stations provide the cell with the network coverage which can be used for transmission of voice, data, and other types of content.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Mobile Networks and Applications**. Potential topics include, but are not limited to:

- Wireless and mobile networks
- Mobile communications and networks
- Mobile Ad Hoc networks
- Design and implementation
- Mobile computing and algorithms
- Mobile cloud computing
- Communication protocol
- Security and privacy issues
- Digital integration and operation
- 5G technology
- Internet of things
- Intelligent management and applications

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Mobile Networks and Applications***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 20th, 2021
Publication Date	June 2021

Scientific Research
Open Access
