Special Issue on Mobile Computing and Communications

Call for Papers

Mobile Computing is a technology that allows transmission of data, voice and video via a computer or any other wireless enabled device without having to be connected to a fixed physical link. There three concepts are closely related to each other and widely used nowadays. Mobile Communication is the use of technology that allows us to communicate with others in different locations without the use of any physical connection.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Mobile Computing and Communications**. Potential topics include, but are not limited to:

- Mobile communications and networks
- Mobile Ad Hoc network
- Mobile wireless sensor network
- Design and implementation of mobile learning
- Algorithms, methods, and applications in mobile computing
- Machine learning in mobile computing
- Mobile cloud computing
- Mobile telecommunications protocols
- Security and privacy issues
- Digital integration and operation
- 5G technology
- Internet of things
- Intelligent mobile applications

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Mobile Computing and Communications***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 29th, 2021

Publication Date	January 2022
