Special Issue on Information Technology and Applications

Call for Papers

Information technology (IT) is the application of computers to store, study, retrieve, transmit and manipulate data, or information, often in the context of a business or other enterprise. Several industries are associated with information technology, including computer hardware, software, electronics, semiconductors, internet, telecom equipment, and e-commerce.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information Technology and Applications**. Potential topics include, but are not limited to:

- Information processing
- Data modeling
- Information systems
- Software and systems modeling
- Cloud computing
- Mobile computing
- Information security
- Information science & engineering
- Data analytics and artificial intelligence
- Machine learning
- Big data analytics and applications
- Database management systems
- Information and knowledge management
- Health information technology
- Bio-informatics
- Computer-aided design
- Computer integrated manufacturing
- Human-computer interaction
- IoT
- Computer vision and image processing
- Multimedia systems and applications
- Intelligent and decision support systems
- IT and e-business

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Information Technology and Applications***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 29th, 2022
Publication Date	November 2022

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
