Special Issue on Computer Systems Engineering

Call for Papers

Computer systems engineering focuses on the development of both software and hardware skills for designing and building the smart products that are an integral part of the wired world.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Computer Systems Engineering**. Potential topics include, but are not limited to:

- Computing and information systems
- Computer systems and networking
- Systems and information engineering
- Systems modeling
- Software methodologies
- System architecture and design
- Operating systems
- Embedded systems
- Information systems
- Ultra high speed computations
- Intelligent systems
- Control system engineering
- Automation and robotic engineering
- Digital health systems
- Applied deep learning

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Computer Systems Engineering***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 16th, 2023
Publication Date	April 2023
