
Special Issue on Information and Communication Technologies and Applications

Call for Papers

"Information and Communication Technologies and Applications" focuses on understanding the technologies, systems, and applications that enable the capture, processing, storage, transmission, and retrieval of information in various domains. Researchers in this field explore the design, development, implementation, and utilization of information and communication technologies (ICTs) to address societal, organizational, and individual needs. They investigate how ICTs impact various aspects of our lives, including communication, education, healthcare, business, entertainment, and governance.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information and Communication Technologies and Applications**. Potential topics include, but are not limited to:

- Computer networks and communication systems
- Information systems and management
- Data analytics and management
- Human-computer interaction
- Data science and big data analytics
- Cybersecurity, privacy and digital forensics
- E-government and digital transformation
