
Special Issue on Cloud Computing

Call for Papers

Cloud computing is the delivery of computing services—including servers, storage, databases, networking, software, and analytics—over the internet, enabling on-demand access to resources and scalable solutions. This technology allows users and organizations to store and process data remotely, reducing the need for physical infrastructure and maintenance. Cloud computing models, such as public, private, and hybrid clouds, offer flexibility and cost efficiency, facilitating collaboration, data sharing, and innovation across various sectors, including business, education, and healthcare.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Cloud Computing**. Potential topics include, but are not limited to:

- Cloud architecture
- Cloud infrastructure
- Cloud platforms
- Cloud security and privacy
- Cloud service models
- Cloud storage and data management
- Cloud resource management
- Cloud networking
- Cloud performance optimization
- Cloud computing for big data analytics
- Cloud interoperability and portability
- Edge computing
- Cloud migration strategies
- Cloud economics and business models
- Cloud applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Cloud Computing**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 20th, 2025
Publication Date	May 2025

Guest Editor: Dr. Claude Tadonki (Paris Sciences et Lettres University, France)
