

Special Issue on Web Technologies & Cloud Computing

Call for Papers

Web Technologies & Cloud Computing is an interdisciplinary field focused on the design, development, and deployment of web-based systems and cloud infrastructures. It covers web architectures, front-end and back-end technologies, distributed systems, virtualization, scalability, security and cloud service models, enabling efficient, flexible, and reliable delivery of applications and services over the internet.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Web Technologies & Cloud Computing**. Potential topics include, but are not limited to:

- Web application development
- Cloud infrastructure and virtualization
- Cloud architecture & service models
- Distributed systems and microservices
- Cloud security and privacy
- Scalable data storage and databases
- Serverless computing and function-as-a-service
- Web performance optimization
- DevOps, GitOps, & platform engineering
- Edge computing and content delivery
- Cloud-Based artificial intelligence and big data processing
- Web protocols, APIs, & architectural styles
- Modern web front-end engineering & frameworks
- Blockchain-enabled cloud systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Web Technologies & Cloud Computing**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 23rd, 2026
---------------------	------------------

Scientific Research
Open Access

Journal of Computer and Communications

ISSN Online: 2327-5227

Publication Date	June 2026
