

Special Issue on Computer Systems and Networks

Call for Papers

Computer Systems and Networks is an academic field that studies the design, implementation and management of computing infrastructures and communication networks. It covers operating systems, distributed systems, cloud computing, network architecture, cybersecurity and performance optimization. The field focuses on ensuring reliability, scalability, efficiency and security of interconnected systems that support data processing, storage and transmission across local and global environments.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Computer Systems and Networks**. Potential topics include, but are not limited to:

- Network architecture, protocols and standards
- Operating systems
- Computer networks
- Distributed systems
- High-performance computing
- Parallel computing
- Wireless and mobile networks
- Cloud computing systems
- Network security and cybersecurity
- Edge & fog computing
- Software-defined networking and network virtualization
- Performance evaluation & modeling
- Embedded and real-time systems
- Blockchain and decentralized systems
- AI/ML and network systems
- Internet of things

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Computer Systems and Networks**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 29th, 2026
Publication Date	July 2026

For publishing inquiries, please feel free to contact the Editorial Assistant at submission.entrance1@scirp.org
