
Special Issue on
Information, Network & Computer Security
Call for Papers

Information, Network & Computer Security studies the protection of digital systems, networks, and data from unauthorized access, attacks and damage. It covers cryptography, secure communication, system vulnerabilities and risk management. The field explores methods to ensure confidentiality, integrity and availability of information, including intrusion detection, authentication and security protocols, aiming to safeguard individuals, organizations and critical infrastructures in an increasingly digital and interconnected world.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information, Network & Computer Security**. Potential topics include, but are not limited to:

- Cryptography and encryption
- Network protocols and security
- Cybersecurity and cyber threat intelligence
- System & hardware security
- Cloud security
- AI/ML security
- Information security
- Privacy and data protection
- Malware analysis & reverse engineering
- Intrusion detection and prevention systems
- Digital forensics and incident response
- Software & application security
- Wireless and mobile security
- Identity and access management
- Cyber-physical systems security
- IoT and embedded systems security
- Security of emerging technologies

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Information, Network & Computer Security**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 23rd, 2026
Publication Date	August 2026
