Special Issue on

Environmental Monitoring, Modeling and Assessment

Call for Papers

Environmental Monitoring is considered as the activities that assessment of environmental quality, pollution level and its changes, which is used in the preparation of environmental impact assessments. It is including detection the circumstances in which human activities carry a risk of harmful effects on the natural environment, the variations of environmental quality, and as the basis for the environmental management and pollution control. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of environmental monitoring, modeling and assessment.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Environmental Monitoring, Modeling and Assessment**. In this special issue, potential topics include, but are not limited to:

- Technology of environmental monitoring
- Effective of environmental monitoring
- Assessment of environmental monitoring
- The application of environment model
- Mathematical model of water environment
- Environment system model
- Environmental impact assessment

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Environmental Monitoring, Modeling and Assessment***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 26th, 2016
Publication Date	July 2016
