

Special Issue on Solid Waste Management

Call for Papers

Waste is a waste type consisting of everyday items that are discarded by the public. The municipal solid waste industry has four components: recycling, composting, landfilling, and waste-to-energy via incineration. Waste management is all those activities and action required to manage waste from its inception to its final disposal. This includes amongst other things, collection, transport, treatment and disposal of waste together with monitoring and regulation. It also encompasses the legal and regulatory framework the relates to waste management encompassing guidance on recycling etc.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **solid waste management**. In this special issue, potential topics include, but are not limited to:

- Municipal solid waste
- Components of solid waste management
- Waste management system
- Waste handling and separation
- Separation and processing and transformation of solid wastes
- Transfer and transport
- Energy generation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Solid Waste Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 8th, 2016
Publication Date	February 2017
